### **Abu Obaida, the English spokesman, answers important Questions about the Brigades**

#### **What is the justification behind the martyrdom operations against the " Israeli" civilians?**

There is no justification for targeting civilians. It is against Islam to deliberately kill unarmed civilians during jihad. In addition, our doctrine is to target the enemies army, security services, and support apparatus. But it is known that Zionist society is a militarized society. Service in the army is mandatory; and reserve duty continues past the age of 40. Our determined stance is that unarmed persons on both sides of the conflict should be left out of the fighting. However, we will not accept giving the enemy a free hand against our civilians.

#### **What is the latest news about Shalit?**

No news. Shalit is one enemy soldier captured from a combat position (from inside a tank) besieging the Gaza Strip. We have more than 10,000 prisoners, the majority of them taken from their homes in our occupied land.

#### **How much your preparation to defend any aggression on the Gaza Strip? Are you in a dilemma under the siege?**

We know that our enemy has support from all over the world. The Zionist army is very well equipped with the most modern weapons that include tanks, aircraft, artillery, and other equipment. But they are an occupying power; and we are an occupied people fighting to defend ourselves. We firmly believe in Allah the Almighty; and we pray for his support in our battle. That is our most important preparation against any future aggression. After that, we are exerting all possible effort to train our fighters and upgrade their capacities and equipment to confront any aggressors and inflict heavy and surprising casualties among their ranks.

### The politicians in the Zionist entity have plans to execute more bloody operations against the brigades and Hamas, what can you say about that?

They have been doing that for 20 decades. Nothing new here. They have failed to eliminate us; and their failure, Allah-willing, will continue till we attain all our rights.

### What if the Zionist entity executed its threatens and assassinated your leaders, How your response will be look like?

We do not and will not discuss details. But let us compare Hamas before and after the assassinations of Sheikh Yassin, Eng. Abu Shanab, and Dr. Rantisi. We have gained strength from these painful losses; and our organization has become more powerful. We are not a figurehead organization; we are a resistance movement with deep roots in our Palestinian, Arab and Islamic culture. We are only the tip of the iceberg of a nation of hundreds of millions of freedom-loving Muslims.

### What is your message to the Zionist entity?

Our message is clear. We will not give up a single right of ours; and we will continue the struggle till our rights are restored. Till then the sword will be the judge between us.

### Are Hamas working on developing better Qassam Rockets? I think this is very important.

Hamas is working to develop all its combat abilities. We do not and will not go into details.

### Why doesn't Hamas get anti-aircraft weapons to shot down Zionist Helicopters.

No answer.

### Why doesn't Hamas make more propaganda videos of Zionist Tanks being destroyed and Soldiers being shot?

We do our best to cover our operations; but we cannot cover every single operation we conduct against the enemy.

### how does Hamas use in their bombs?

Our bombs are used against enemy armored vehicles and infantry.

### How can we none-Muslims (who support Hamas anyway) make a fond to raise money for the troops of Al Qassam?

We advise giving general support to the victims of the Zionist occupation. There are tens of thousands of people who have lost family members, homes, and jobs as a result of the occupation. Helping them is a very good way of supporting the Palestinian people.

### **Why do the soldiers of Al-Qassam Brigades wear masks ?? what is the reason behind it ??**

Our troops wear masks to conceal their identity. We are operating in an environment where there are more hidden enemies than visible ones. We try to take as many security measures as possible so as not to help the enemy target our troops.

### **How does one become a Member of Al Qassam In Gaza?**

Al-Qassam chooses its members. We do not have an open registration policy.

### **Why does Hamas stay silent about kouffaar regimes who make their support for Abbas and al-Fatah?**

Our struggle is against the Zionist enemy. We are not in a war against non-Muslims or against Muslims who support parties that act against the resistance. However, we make it clear that we will defend our resistance project with all our strength. We will not allow any party to interfere or hinder our resistance action.

### **How come Ezzedeen al-Qassam don't punish these regimes?**

We take actions, covert and visible. However, our main enemy is the Zionist occupation. We will not let this enemy rest by getting involved in other conflicts.

### **What is the position of Ezzedeen al-Qassam Brigades about these speeches from Doctor al-Dhawahry where he makes attacks on the djehad and says that al-mokawama in palatine has given up on istshahadiya operations?**

We do not tell Al-Dhawahry what to do in Afghanistan since we are not aware of his situation. And I'm sure that his knowledge of our circumstances is very limited. His judgments and opinions are his; but they are not correct. More importantly, we are not awaiting approval or blessing from anyone except Allah.

### **Why does he make all these attacks and this fitnaah?**

Al-Dhawahry's impact is only in the media. Otherwise, we are not affected by his comments at all on the ground.

### **How do you deal with Jaysh al-Islam in al-Falasteen since the release of the Brittaani journalist?**

They are treated like any resistance group actively seeking to target the Zionist enemy. But on the internal front, it is very clear for them that they cannot interfere in internal affairs or cause internal problems.

### **Will Hamas make the most of its weaponry and existing**

**capabilities, by increasing the usefulness of its weapons? This can be done readily by adapting Qassam rockets to carry new warheads like smoke, teargas, anti tank, incendiary and cluster sub-munitions. It can also include the use of thermite warheads on rockets and hand grenades. Thermite will melt any Zionist armored vehicles and structures.**

We are doing our best to upgrade our capabilities. However, we stress that our source of strength is Allah the All-Mighty. We will never have equipment comparable to our enemy; but we will have enough to make any aggression a regrettable adventure for the enemy.
